PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience delivering business intelligence, revenue assurance, regulatory reporting, data reconciliation and data quality solutions across insurance and banking. Advanced in SQL, Python, Pandas, Advanced Excel, Power BI, Apache Superset, Trino, Snowflake and AWS S3. Improved commission calculation accuracy from approximately 50% to 99%, built three financial years of IRDAI reporting data in under nine months, and automated analysis across multi-million-row datasets.

PROFESSIONAL EXPERIENCE

Paytm Insurance Broking Pvt. Ltd. | Data Analyst - Insurance Analytics Noida | Sep 2025 - Present

- Improved commission-rate calculation accuracy from approximately 50% to 99% by identifying incorrect mappings, redesigning partner and product rules, and implementing transaction-level validation controls.
- Created and operationalized a consolidated three-financial-year IRDAI regulatory reporting dataset that was previously unavailable in analytical tables, completing historical backfill and recurring reporting in under nine months.
- Analyzed and reconciled 2.4M+ policy-level records across operational, billing, partner and compliance sources using advanced SQL, Trino, Python and Pandas; resolved missing, duplicate, mismatch, cancellation and short-commission exceptions.
- Developed revenue, premium, commission and profitability analysis by partner, product, segment and time period; performed root cause, trend, variance and ad hoc analysis for business and compliance stakeholders.
- Built automated MIS and compliance dashboards with KPI tracking, filters, month comparisons and executive summaries using Power BI, Superset, Google Sheets and Apps Script, reducing dependence on manual reporting.

Prestanda Consulting | Snowflake Data Engineer - Analytics & Reporting Noida | Jul 2024 - Aug 2025

- Developed analytics-ready Snowflake data models and SQL transformations across 200M+ records, supporting business intelligence, KPI reporting, reconciliation and downstream analysis.
- Improved recurring query performance through SQL optimization, join redesign, pruning strategies and workload tuning; created reusable datasets for dashboards and stakeholder reporting.
- Implemented data validation, exception reporting and quality controls to improve the accuracy and reliability of analytical outputs.

RBHU ETG Pvt. Ltd. (Client: RBL Bank) | SQL Developer - Data Analytics Mumbai | Jul 2023 - Jul 2024

- Analyzed UPI, NEFT and IMPS transaction data for AML monitoring, compliance reporting and exception analysis using SQL, joins, window functions and validation checks.
- Reduced SQL execution time by approximately 30% through query tuning, optimized joins and partition-aware filtering while supporting accurate transaction-level reporting.

TECHNICAL SKILLS

Data Analysis: Business Intelligence, Data Visualization, Dashboard Development, KPI Reporting, MIS Reporting, Ad Hoc Analysis, Root Cause Analysis, Trend Analysis, Variance Analysis, Revenue Analysis

Data Management: Data Cleaning, Data Validation, Data Quality, Data Reconciliation, Data Modeling, ETL, Requirements Gathering, Stakeholder Management, Process Automation, Regulatory and Compliance Reporting

Tools: SQL (CTEs, joins, window functions, query optimization), Python, Pandas, Advanced Excel, Power BI, Apache Superset, Trino, Snowflake, PostgreSQL, AWS S3, Google Sheets, Apps Script

SELECTED PORTFOLIO PROJECT

Revenue Assurance & Compliance Analytics Portfolio: Sanitized case studies covering commission validation, revenue leakage analysis, reconciliation automation, compliance data consolidation and executive dashboards using SQL, Python and BI tools.

EDUCATION

PG Diploma in Big Data Analytics - CDAC Mumbai | 2023
